Audra Safe router device

Setup guide

To set up your new Audra router, follow the steps below using the Audra mobile app

1. Unbox your Audra device

Make sure you have:
- Your Audra router
- Power adapter
- Ethernet cable
- An active internet modem/ONT (provided by you ISP)
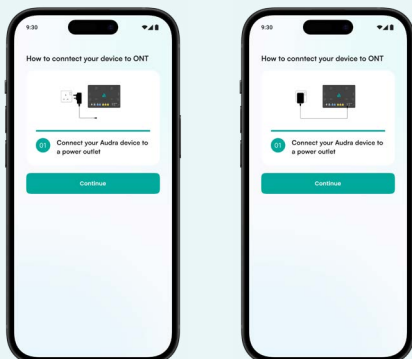

2. Download the Audra app

- Open the **Apple App Store** or **Google Play Store** on your smartphone
- Search for **'Audra'**
- Download and install the Audra app
- Open the app to begin setup

3. Power on your Audra router

- Plug your **Audra router** into a power outlet
- Wait until the device powers on
- In the app, tap **'Continue'** when prompted to confirm the device is connected to power

4. Ensure your modem / ONT is powered on

- Make sure your **ONT or modem** is connected to a power outlet
- Confirm it is fully powered on and ready
- Tap **'Continue'** in the app to proceed

5. Connect Audra to your modem / ONT

- Using the Ethernet cable:
  - Plug one end into the **LAN port** on your modem/ONT
  - Plug the other end into the **2.5G WAN port** on your Audra router
- Tap **'Continue'** in the app

6. Select your Audra device

- The app will scan for nearby devices
- Select your Audra router from the **Available Audra devices** list
- The app will automatically begin downloading configurations

7. Connect your phone to Audra Wi-Fi

- Copy the **Wi-Fi password** shown in the app
- Go to your phone's Wi-Fi settings
- Connect to one of the AudraSafe Wi-Fi networks listed
- Return to the Audra app and tap **'Connect'**

8. Prepare the device

- Keep your phone near the Audra router
- The app will:
  - Connect to the device
  - Update configurations
  - Establish the Wi-Fi network
- This may take a few minutes please be patient

9. Confirm setup completion

- When you see **"You're all set! You can now connect all your devices to the Wi-Fi"**, tap **'Continue'**
- Your Audra router is now online and operational

10. Configure Wi-Fi settings
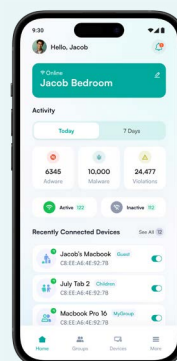

You can customise your network by:
- Editing the **SSID (Wi-Fi name)**
- Changing the **Wi-Fi password**
- Selecting the **security mode (WPA2/WPA3)**
- Turn on Enable WPS and SSID hide

Tap **'Save Configuration'** when finished, or **Skip** to keep the default settings.

11. Access your network dashboard

- You'll be taken to the Audra home screen
- From here you can:
  - View connected devices
  - Run speed tests
  - Monitor activity and security
  - Manage network settings
